#About me

I'm a web developer from Poland that enjoys creating applications that find use in the day-to-day lives of others. Besides working on cool projects, I also enjoy reading, biking, and trying interesting beverages.

#Skills

Node.js | JavaScript/Typescript | HTML/CSS | React | Next.js | Express.js | Electron | Git | React Native | TailwindCSS | PostgreSQL | Firestore

#Languages

English | Polish

#Experience

Full-Stack Developer at STREBER SOFT

June 2021 — May 2022 (Poland, Remote)

- Worked on an ERP system for a plastic processing company:
  - Worked on a web app used for system administration made using Next.js, Typescript
  - Developed multiple desktop apps using Electron.js, React, Typescript, TailwindCSS
  - Developed a mobile application in React Native for quality control of produced products
  - Automated generation of PDF/XLSX reports
  - Expanded already existing Express.js REST API
  - Worked with PostgreSQL database
- Worked on a SaaS app for scheduling doctor appointments:
  - Developed a web app using Next.js Typescript, TailwindCss containing:
    - Control panel for a doctor to specify when they work, breaks, and categories that patients may choose from during scheduling
    - Real-time view for a doctor of all planned visits with options to preview visit information, cancel or re-schedule a visit
    - Panel for patients to schedule visits
  - Created REST API (Typescript, Node.js, Express.js, Knex)
    - Automated email notifications for patients
    - Managed PostgreSQL database
