About me

I'm a full-stack developer from Poland who has a passion for building highly interactive applications, whether they're useful tools or just fun projects. Outside of programming, I love reading sci-fi, dystopian, and fantasy genres. I'm also a coffee and tea enthusiast, always eager to try new tastes.

Experience

Full-Stack Developer at Storydoc

Remote, International

- Collaborated with an international team of developers, ui/ux/story designers and product managers.
- Worked on an AI-powered presentation SaaS. Implemented features such as a fully interactive WYSIWYG rich text editor, AI integration, new slide components, and PDF generation using Puppeteer. Focused on optimizing the product and was responsible for managing bug fixing.
- Worked on internal tooling for testing/adjusting ai features

Full-Stack Developer for Dentica (Freelance)

Remote, Poland

- Collaborated closely with the dentist to create an easy-to-use and efficient system.
- Developed multiple iterations of a patient management desktop app for a dentist. Built a user-friendly system for scheduling appointments and keeping track of patient procedures. Created an integration with an SMS API (using cloud functions) to send automated notifications and reminders to patients about their appointments, as well as to update dentist's schedules in real-time.

Full-Stack Developer at STREBER SOFT

Remote, Poland

- Worked under an experienced developer/dev-op/product manager.
- Worked on an ERP system for a plastic recycling/manufacturing plant. Developed a web app, and multiple desktop and mobile apps for production, quality, and shift management. Managed the PostgreSQL database. Implemented generation of PDF/XLSX reports. Collaborated with users to improve the system further.
- Extended an ERP system for a metal manufacturing plant. Worked on product ordering system. Maintained and implemented new features for a desktop app based on user feedback.
- Developed a responsive appointment scheduling web app for a student/work doctor. Implemented flexible and easy-to-use schedule manager. Worked on PDF generation and automated email notifications.

Projects

Cyberpunk breach protocol

A fan recreation of the hacking mini-game "Breach Protocol" from Cyberpunk 2077

TypeScript React HTML CSS TailwindCSS
Zustand Biome Rsbuild

SVG to React / Native / SolidJS

A Figma plugin that lets you easily optimize and transform multiple SVG files into JSX components.

Figma TypeScript Solidjs Turborepo HTML
SCSS TailwindCSS Biome Vite Vite
SVGO Prettier Node.js

Char typer

Yet another app to train your typing skills, with focus on typing characters instead of words.

TypeScript React HTML SCSS TailwindCSS
Zustand Rsbuild Biome

Fast SVG Optimizer

A tool for optimizing SVGs using SVGO. Process multiple SVGs at once, preview the before-and-after, adjust SVGO settings, and batch edit dimensions for all SVGs.

TypeScript Solidjs SVGO HTML
TailwindCSS Vite Biome Mixpanel
