About me

I'm a developer from Poland who enjoys building highly interactive applications, whether they're practical tools or just fun projects. Outside of programming, I love reading sci-fi and fantasy books. I'm always listening to something, and I enjoy both coffee and tea.

Experience

February 2025 - June 2025,
March 2023 - December 2023
Full-Stack Developer at **Storydoc**

- Collaborated with a global team (developers, UI/UX/story designers, product managers) to build an AI-powered presentation SaaS.
- Developed core features: interactive WYSIWYG rich text editor, AI integrations, custom slide components, and PDF generation (using Puppeteer).
- Optimized product performance and led bug triage/fixing efforts.
- Built internal tools to test and refine AI-driven functionalities.

July 2022 - September 2022
Full-Stack Developer for **Dentica**

- Partnered with a dentist to design and refine a user-friendly patient management system.
- Developed and iterated on a desktop app for appointment scheduling, procedure tracking, and real-time updates.
- Integrated SMS API (via cloud functions) for automated patient notifications and dynamic schedule management.

June 2021 - May 2022
Full-Stack Developer at **STREBER SOFT**

- Collaborated with senior developers/dev-ops/product managers on ERP systems for manufacturing plants (plastic recycling and metal production).
- Developed and maintained web, desktop, and mobile apps for production, quality, and shift management, including PDF/XLSX report generation.
- Extended ERP functionality for a metal manufacturing plant, focusing on product ordering and user-driven feature improvements.
- Built a responsive appointment scheduling web app for a doctor, featuring a flexible schedule manager, PDF generation, and automated email notifications.

Pet projects

Cyberpunk breach protocol
A fan recreation of the hacking mini-game "Breach Protocol" from Cyberpunk 2077.

SVG to React / Native / SolidJS
A Figma plugin that lets you easily optimize and transform multiple SVG files into JSX components.

Fast SVG Optimizer
A tool for optimizing SVGs. Process multiple SVGs at once, adjust SVGO settings, and batch edit dimensions for all SVGs.

WebDevTools
A collection of useful tools for developers.
