SUMMARY

Developer based in Poland working mainly with TypeScript, React, and Node.js, building highly interactive applications. Shipped end-to-end products in SaaS, dental, and manufacturing, including AI tools and large ERP systems. Comfortable working closely with designers, PMs, and DevOps to get real problems solved.

SKILLS

Languages: Polish, English

Core: JavaScript/TypeScript, HTML/CSS, React, React Native, Next.js, Node.js, Express, PostgreSQL, MongoDB, Git

Other: TailwindCSS, Expo, Electron, SolidJS, Svelte, Astro, Vitest, Puppeteer, SQLite, Vite, Supabase, Firebase, Webpack, Rsbuid, Vercel, Figma, Zustand, OpenAI, Mixpanel, Turborepo

Exploring: Go, Rust

EXPERIENCE

Full-Stack Developer - Storydoc

Mar 2023 - Dec 2023 & Feb 2025 - Jun 2025

- Worked with a global team of developers, designers, and product managers to build an AI-powered presentation SaaS platform.
- Delivered core product features, including an interactive WYSIWYG rich text editor, AI integrations, custom slide components, and PDF generation with Puppeteer.
- Improved product performance and led bug-fixing efforts.
- Created internal tools to test and refine AI-driven functionality.

Full-Stack Developer - Dentica

Jul 2022 - Sep 2022

- Partnered with a dentist to design and refine a user-friendly patient management system.
- Built and iterated on a desktop app for appointment scheduling, procedure tracking, and real-time updates.
- Integrated an SMS API through cloud functions to automate patient notifications and manage scheduling changes.

Full-Stack Developer - STREBER SOFT

Jun 2021 - May 2022

- Built ERP systems for plastic recycling and metal production plants, partnering with a senior developer who covered DevOps and product.
- Maintained web, desktop, and mobile apps for production, quality, and shift management, including PDF and XLSX report generation.
- Extended ERP functionality for a metal manufacturing plant, focusing on product ordering and user-driven feature improvements.
- Developed a responsive scheduling web app for a doctor's practice, with a flexible schedule manager, PDF generation, and automated email notifications.

PROJECTS

Cyberpunk Breach Protocol

A fan recreation of the hacking mini-game "Breach Protocol" from Cyberpunk 2077.

SVG to React / Native / SolidJS

A Figma plugin that lets you easily optimize and transform multiple SVG files into JSX components.

Fast SVG Optimizer

A tool for optimizing SVGs. Process multiple SVGs at once, adjust SVGO settings, and batch edit dimensions for all SVGs.

Shortie (Text expander)

A very simple text expander made in rust
